PRIME REALTY DEVELOPMENTS

Engaging with credible realty development projects and presenting a core wealth creation entity within the Integer Wealth Global group, while developing both own and third-party projects through the funding and or investments from iWealth Finance Ltd and using the risk management and financial governance of Integer Wealth Professional Services Ltd. Integer Prime Realty Developments is also proud to announce our recent partnership with a prestigious London based developer for this exciting initiative.

Key scope:

The birth of IPRD was a natural progression and development of a core business component within the Integer Wealth Global group of companies.

Through the associate companies within the group such as Integer Professional Services Ltd, iWealth Finance and iWealth Transaction Technologies Ltd, the natural progression of the group's own property development company was inevitable.

IPRD proudly integrates seamlessly within the group, automatically garnishing the benefit of professional business services, funding and investment into the IPRD fixed asset acquisitions as also its own property developments sized from flipping houses to buildings across the UK and European continent.

IPRD is therefore geared and positioned specifically to greatly develop equity value within the group and catalyses equity growth for Integer Wealth Global to be an attractive investment destination itself.

With an ever-growing array of building, property development and building acquisition portfolio, IPRD continually grows in its cash value and equity, with extraordinary returns on investments for investments.

Key benefits:

- First option for development of key high net return projects
- Ability to readily raise or apply funding from associate and internal companies
- Access to professional services including risk and governance management from parent company
- Multiple investor benefits created through integrated management model from parent company
- Provide secure stable platform for investment
- Develop clear equity value for partner and associate member companies
- Provides constant supply chain work for contractors
- Apply consistent fair-trade policy environment
- Creates additional investment destination for parent company with minimal risks
- Benefits from multiple internal associate skillsets
